Statement of originality

This deliverable contains original unpublished work except where clearly indicated otherwise. Acknowledgement of previously published material and of the work of others has been made through appropriate citation, quotation or both.

Disclaimer

'This project has received funding from the European Union's Horizon 2020 research and innovation programme under Grant Agreement **No 645791**'. 'The opinions expressed in this document reflect only the author's view and reflects in no way the European Commission's opinions. The European Commission is not responsible for any use that may be made of the information it contains.'

Reference to the Description of Action (DoA):

D5.6 Communication Report draft- version 1 (Report, PU, month 4)

More information about this deliverable can be found in the task description of the Grant Agreement.

Task 5.1 (M1-M24): Web-platform and online community (Task leader: T.S.R.Act)

In parallel, the specification of the **project website** (including community page at FB, Vimeo channel and Twitter) will be prepared by T.S.R.Act and also proposed for discussion to other project partners, so that a first version can be put online before the end of month 3. Among planned website characteristics: attractive look and feel, easy navigation, interactive features (namely to get feedback and collect inputs from visitors), signup for the hackathons, **wikipages** for the hackathon participants, rich content (detailed information on project activities, lifetime of projects developed under BH, deliverables produced by the project, relevant background documents, useful links, **video recordings** of project events, etc.), frequent updates (in particular through news items produced by the project), linked to an open online community focusing on issues addressed by the project.

Final revision of website

As the final revision of the website has been a mainly technical affair, we suffice by providing a brief list of actions that have been carried out.

- *Updating of website plugins*
- *General Wordpress infrastructure update*
- *Addition of new plugin to take care of amount of bot-generated comments on Blogposts.*
- *Revisiting website to ensure proper publication of deliverables*
- *Advice on future development of website has been provided by Artshare but falls out of the scope of this project.*
 - *–The website would be more accessible if starting page would be a one page graphically very clear MAP structure. which immediately transports the general actions and benefits of the projects. This MAP would link (via html links to website content) to the details by clicking on graphics / pictures on the MAP.*
